GREY SHEEPSKIN

My new favourite ultra-upholstery texture gets a lot of cred for its natural, deep-pile wooliness and chalet chic. These are a new, bespoke addition to the South African Sheepskin Co.'s range of unshorn-merino sheepskins, which are byproducts of the food industry. southafricansheepskin.com

MID-CENTURY TWEED

Of all the legions of grey upholstery textiles out there, this is a superb fabric for chairs with a gently-curved back, swoopy Kagan-esque sofas and wingback headboards because the dappling creates a chiaroscuro dimension that reads like soft-focused camo pattern. hertex.co.za; okha.com ▶
